Pergolino

WALL FIX REQUIRED SPACE

The **Pergolino** model is the ideal sun and weather protection for private homes and commercial applications.

The wall-mounted unit includes post profiles under the guide rails that provide the system with a high degree of stability. These vertical posts accommodate applications over clear spaces that have no existing sub-structure to attach a standard guide rail application. The supports can be secured with a ground sleeve or attached to the surface with a mounting foot.

The robust system includes a full cassette for additional fabric protection and can be assembled quickly and easily. The guide rails have integrated gas cylinders combined with stainless steel cables to ensure constant tensioning of the fabric in any position.

Optional Remote Control Motors and electronic sun and wind controls are available.

PRODUCT SPECIFICATIONS

Linear Width	6'7" – 23'0"
Projections	6'7" – 20'0"
