

Stobag Jumbo

Stobag Jumbo

Awning for Large Areas with Telescopic Arms and Motors

This awning for large surfaces with patented Stoboscope arm technology is especially suitable for restaurants and terraces. The telescopic arms allow projections up to 16' 5". The base plates with integrated intermediate bearings are fixed directly to the facade or the pre-installed ceiling brackets. The base plates hold the mounting bar on which the roller tube, the self-aligning bearing, the roller tube bracket and the top board are mounted. Four telescopic arms can be installed even on relatively small awning widths, providing a very stable construction. Standard drive with motor (standard with Somfy) Supplied only with cover. Units above 20' require 2 motors and synchronizer.

Product Coverage:

Horizontal Widths:
156 to 456 inches (13' to 38')

Projections:
197 inches (16'5")

Roller Tube:
78 mm, Slotted, Extruded
Aluminum 6061-T6 alloy, mill finish

Mode of Operation:

Somfy Tubular Motor

Hardware Color:

White
Custom colors available at additional charge.

Stobag JUMBO

Motorized Telescopic Arm Awning System

AWNING OPEN ROLLER TELESCOPIC ARM

The Stobag Jumbo awning provides constant tension on large projection applications.

The Stobag JUMBO is a large projection awning system with patented telescopic arm technology (gas pressure cylinder) for constant tensioning of the fabric at any position. The framework construction includes self-aligning intermediate support bearings and mounting base plates to which the torsion bar and arm shoulder attachment are connected to along with optional hood and side covers.
