

Van Nuys Awning - Slide On Wire Panels

Van Nuys Awning's Slide On Wire Panels offer an appealing design for pergolas, wood structures, or custom frame. This elegant design adds beauty to restaurant dining, patios, outdoor dining, gardens, poolside, schools, malls, interior skylight to name a few. They are elegant and add beauty to any outdoor patio or dining space. These slide on wire panels move individually to provide shade where needed. They can be pulled back at night to enjoy the stars or closed during the day to keep the harsh sun out.

Van Nuys Awning has created their own special modular design they use that was developed by one of their owners, Don Powell with over 50 years of experience in the awning industry. They are manual slides that are simple to open and close, giving you years of carefree use. They are custom built to fit your space.

They come fully assembled, including all stainless components, which is very simple to install: just set the mounting eyelets where diagramed, thread the cable, connect and tighten the stainless steel turnbuckle. They can be easily removed for storage or cleaning or replacing.

They use Sunbrella fabrics with a 10-year warranty, other acrylic fabrics, or mesh fabric to let in more light according to your needs. They are sewn with Tenara Threads that come with a 10-year warranty to give you years of service. All applications are different so call them to help you fit the Slide On Wire Panels for you!

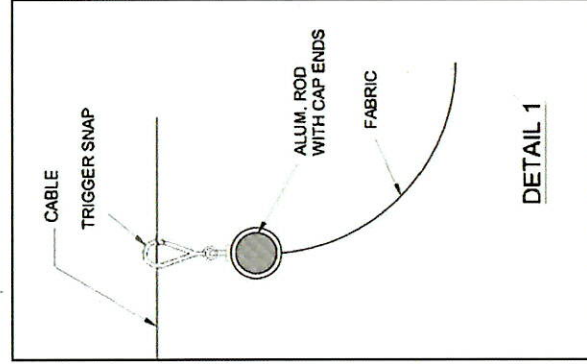

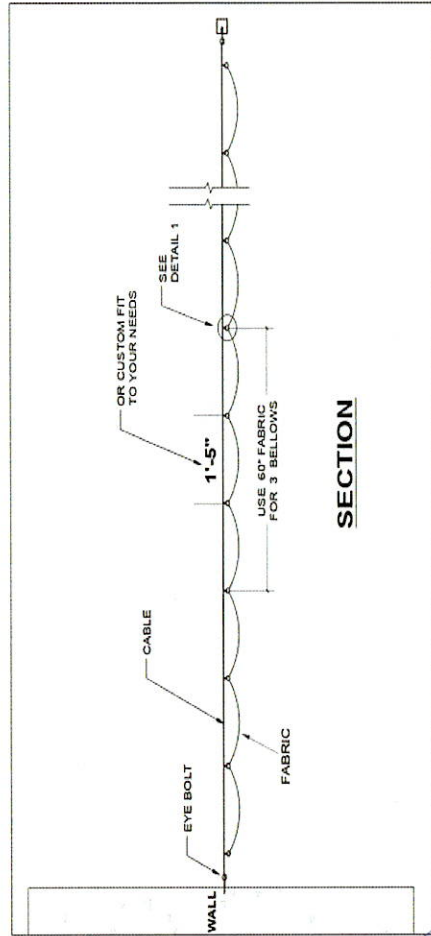

Van Nuys Awning has been in business for over 105 years – call the experts!!
